

HRSA's Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

supports the [Idaho Home Visiting Program](#) and provides voluntary, evidence-based home visiting programs for expectant and new parents with children through kindergarten entry age living in communities that are at-risk for poor maternal and child health outcomes¹.

Evidence-Based Home Visiting Models in Idaho: [Nurse-Family Partnership \(NFP\)](#), [Parents as Teachers \(PAT\)](#)

Idaho MIECHV Program At-a-Glance

Rural Counties²:

Benewah, Bingham, Boise, Bonner, Boundary, Clearwater, Elmore, Idaho, Jerome, Latah, Madison, Owyhee, Power, Shoshone, Twin Falls

Non-Rural Counties²:

Ada, Bannock, Bonneville, Canyon, Kootenai, Nez Perce

Participants

1,350

Households

625

Home Visits

5,939

Idaho Prioritizes Community Needs

MIECHV Program awardees tailor their programs to serve populations of need within their state. In Idaho:

- **89.8%** of households were at or below 200% of the Federal Poverty Guidelines and **59.5%** were at or below 100% of those guidelines.
- **10.6%** of households included a pregnant enrollee under age 21

Idaho Performance Highlights

MIECHV Program awardees track and report improvements in MIECHV benchmark areas every year. Awardees are required by authorizing statute to demonstrate improvement in benchmark areas every three years. In the most recent assessment following FY 2023, the Idaho MIECHV program successfully met the requirements for demonstration of improvement by improving in all 6 [benchmark areas](#).

FY 2023 Performance Highlights Include:

- **Developmental Screening:** 93.9% of children enrolled in home visiting had a timely screening for developmental delays. Early identification, referral to necessary supports and services, and follow-up has been shown to improve the developmental trajectories of children with developmental delays or disability.
- **Early Language and Literacy Activities:** 90.2% of children enrolled in home visiting had a family member who read, told stories, and/or sang with them on a daily basis. Children who are spoken to frequently by their caregivers have larger vocabularies and literacy skills, which are linked to later academic, social, and cognitive functioning.

¹ HRSA awarded ARP ([American Rescue Plan Act](#)) funds to current MIECHV awardees to address the needs of families in response to the COVID-19 pandemic.

² These counties were served by MIECHV formula funds, ARP funds, or both.

Idaho MIECHV Performance Data Compared to National MIECHV Averages

Benchmark Area 1: Maternal and Newborn Health Outcomes

Benchmark Area 2: Child Injuries, Maltreatment, and Emergency Department Visits

Benchmark Area 3: School Readiness and Achievement

Benchmark Area 4: Crime or Domestic Violence

Benchmark Area 5: Family Economic Self Sufficiency

Benchmark Area 6: Coordination and Referrals
